Web Tools In Education

Blended learning are different types of learning skills we use to educate students. In our case we use online learning such as Web Tools. We use Web Tools to input our knowledge and present them to public.

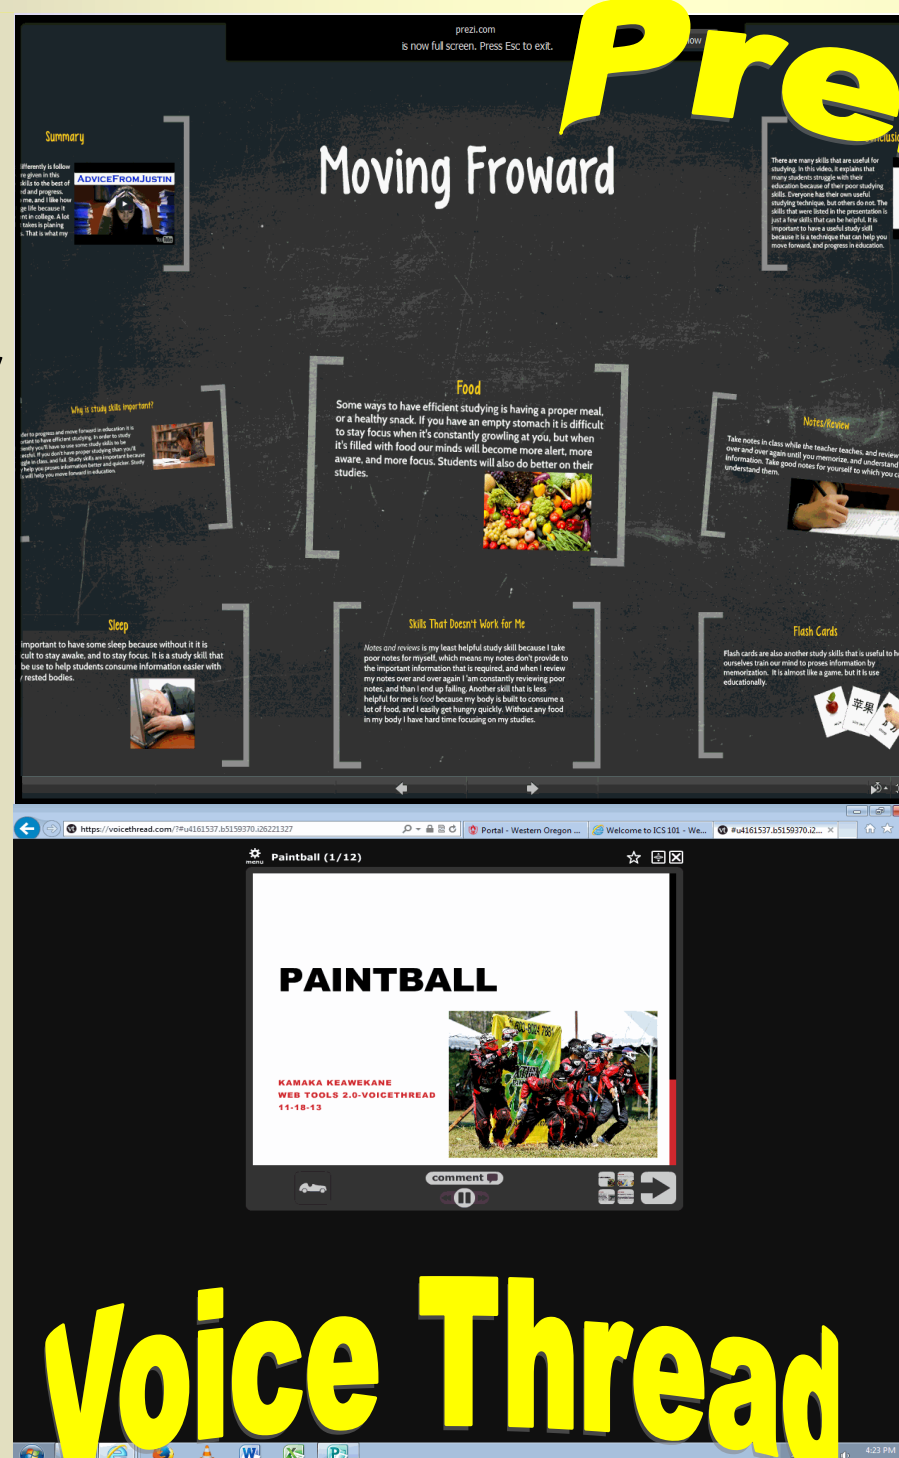

PowToons is almost similar to PowerPoint, but PowToons function more like an animated show. PowToons gives the presentation more life than any other presentation. PowToons is almost like a children presentation because of the animation. Creating a PowToon presentation is much harder, and much longer than any other Web Tools because of the many options it has to offer.

PowToons

Prezi functions like PowerPoint, but the only difference between the two is that Prezi is more unique, and videos can be inserted to the presentation. The transitions are very unique as well. If I had the choice to use Prezi or PowerPoint I would use Prezi because it is more professional than PowerPoint.

The final web tool we did was Voice Thread, and personally I enjoyed this one the most. It didn't matter to me how much better the others are. I just enjoy the simplicity. Voice Thread is just like any other slide show presentation, but the only difference about this one is that you can record your own self presenting you presentation, and others can comment on it by recording their voice. I think this web tool is much easier and much cooler.

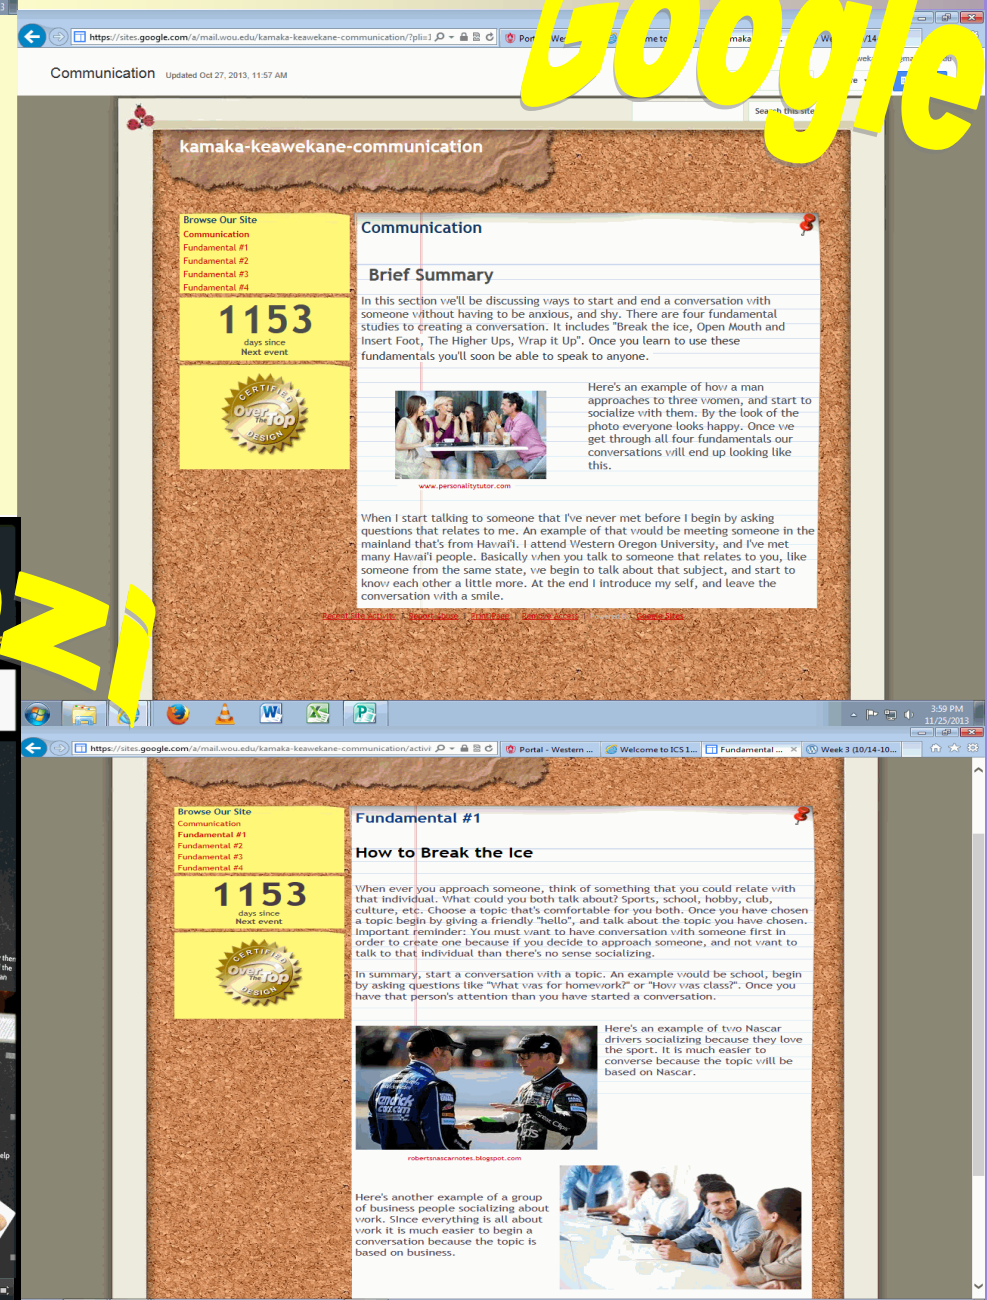

Voice Thread

Another tool I learned to use was Google sites. It's almost similar to a regular website. Our task was to help people that lack public communication by using Google sites. We had to provide info of ways to begin, sustain, and end a discussion. We had to input our personal thoughts, and examples. I feel that this tool could be useful for me in the future when I decide to create my own websites

Google Sites

I personally think that all the web tools are great , and I strongly feel that I would use them in the future. Overall in this class I not only learn how to use the Web Tools, but I also learned the different topics that were given to us as research. My understanding in this class has grown since the beginning of the school year.
